FEEDING DIRECTIONS (WITHOUT FORAGE)

Feed according to the amounts shown below based on the weight of your horse/pony and level of work. The following chart references the amount of SAFE 'N EASY[™] Complete to feed in lb per day when fed without forage as the sole source of nutrition. When being fed as a complete feed, SAFE 'N EASY Complete should be fed at no more than 0.5% of the horse's body weight per meal. For example, for a 1,100 lb horse, feed no more than 5.5 lb per meal. Therefore, approximately four to six small meals should be fed throughout the day. SAFE 'N EASY Complete may be soaked to increase ease of consumption. Soaking is optional.
