

FOAL NUTRITION SOLUTIONS

BE READY WITH SPECIALIZED PRODUCTS SCIENTIFICALLY FORMULATED JUST FOR FOALS

Understanding the nutritional requirements of young, growing foals is essential to make sure the right balance of nutrients are being fed in the correct amounts. Proper nutrition is vital throughout all stages of growth, from gestation through maturity, to help support optimum development.

FOAL-AIDE[™]

FOAL-AIDE Paste by BUCKEYE[™] Nutrition is a scientifically formulated vitamin and trace mineral supplement created for foals. Available in ready-to-use paste.

MARE'S MILK PLUS[™]

A milk replacer for orphaned or rejected foals. MARE'S MILK PLUS contains highly digestible, milk-based proteins to minimize digestive upset and is fully fortified to meet all of the foal's nutritional needs. MARE'S MILK PLUS was developed for free-choice consumption to mimic the foal's natural nursing behavior. Available in 50 lb. bags.

FOAL STARTER

A milk-based creep feed specifically designed for all foals under three months of age. Foal Starter is palatable, easily digestible, and contains prebiotics to support a healthy hindgut microflora. Foal Starter aids in compensating for the natural decrease in production of quality milk during lactation. Transition to BUCKEYE Nutrition Growth or GRO 'N WIN[™] at 3-4 months of age. Available in 50 lb. bags.
