

# Foal Starter

PELLETED FEED

A Transition Feed from Birth to 3 Months of Age

Product No. 30950  
50.0 Lbs. Net Wt. (22.70 Kg)

A complete milk-based creep feed designed to complement your mare's milk	Ensures essential vitamins and bioavailable trace elements are provided as the foal transitions from mare's milk to grain, and to compensate for the natural reduction in production and quality over lactation
A complement to low quality milk or for under-producing mares	Supplements the essential vitamins and trace minerals not provided in the milk
Easily digestible fiber and prebiotic from mannan oligosaccharides (MOS)	Helps the foal transition to and adult fiber-based diet
Elevated vitamin E, C and selenium levels	Antioxidants proven to support immunity and to increase the body's natural defenses
A precise blend of amino acids, milk and soy proteins formulated to meet the foal's unique requirements	Supports your foal's muscle and bone development
Mini pellets	Easily digested, highly palatable and transitions the foal gently to adult food
