## FEEDING DIRECTIONS:

Parakeets require only a small amount of food. However, food must be available at all times. A parakeet cannot survive a period of 24 hours without food. Seeds should be changed daily to remove seed husks and soiled seed. Always maintain a source of clean, fresh water for the birds at all times. Make Buckeye Canary Grit available to the bird as an aid in digestion and cuttle bone as a source of calcium.

**To maintain freshness store in a cool, dry environment. For extended storage keep refrigerated.**
