FEEDING DIRECTIONS

Feed Buckeye® 21% Deer Ration free choice to bucks and fawns on a continuous basis to support maximum growth and antler development. Feed as a creep to fawns while they are nursing for optimum growth. Feed free choice in a covered or protected feeder along with good quality hay, browse, or pasture. Hay is not a nutritional requirement when feeding Buckeye® 21% Deer Ration which contains sufficient quality fiber, but it will help reduce stress from boredom. Provide free access to clean water and Buckeye® T.M. Salt with Selenium at all times. Buckeye® 17% Deer Ration should be used when bucks and does are together during breeding season. Do not feed this product if the feed has become moldy or out of condition.

PLEASE STORE IN A COOL DRY PLACE
