FEEDING DIRECTIONS:

Feed Buckeye® 16% Dairy Feed to growing heifers, bulls, and dairy beef from 3 months to 24 months of age. Offer clean, fresh water, salt, and the appropriate Buckeye® Mineral free choice at all times. Feed excellent quality hay and/or silage. Never feed more than 55% of the total ration as grain. For lactating dairy cows feed approximately 1 pound of Buckeye® 16% Dairy Feed for each 2.5 pounds of milk produced along with the appropriate roughage. Do not allow roughage intake to fall below 1.5% of body weight on a hay equivalent basis. This is a Dairy Grower 1 and 2 Feed and a Lactating Dairy Cattle Feed.

Please store in a cool dry place
