

Advance® Kid milk replacer

WITH COLOSTRUM For Goat Kids

Profile

Advance KID MILK REPLACER is an instant mixing, all-milk protein, complete first feed for kids. With emulsified fats, supplemental vitamins, minerals and trace elements, it provides the entire nutritional requirements of the baby goat from its second day of life through weaning. Kid milk replacer is acidified to prevent bacterial spoilage, providing a shelf life of up to 24 hours once reconstituted.

Guaranteed Analysis

Crude Protein, not less than	23.00%
Crude Fat, not less than	25.00%
Crude Fiber, not more than	0.15%
Calcium, not less than	0.45%
Calcium, not more than	0.95%
Phosphorus, not less than	0.60%
Copper, not less than	10 ppm
Copper, not more than	17 ppm
Vitamin A, not less than	20,000 IU/lb
Vitamin D ₃ , not less than	5,000 IU/lb
Vitamin E, not less than	50 IU/lb

Packaging

Available in:

- 3½ lb bags
- 8 lb bags
- 25 lb bags

Feeding Instructions

MIXING DIRECTIONS

Mix at the rate of 1½ lb per gallon of water (3 oz of powder per pint of water).

- Warm Restricted Feeding: Mix powder in 1/2 quantity of water at 120° F and then dilute to volume and feed at 98° F.
- Cold Ad Lib Feeding: Mix powder in 1/3 quantity of water at 120° F and then dilute to volume and feed at room temperature.

FEEDING DIRECTIONS

- Warm Restricted Feeding: For the first few days, feed a limited quantity (maximum of 1 pint) per feeding up to 3 to 4 times per day. Best results are achieved feeding milk warm (98° F).
- Cold Ad Lib Feeding: This method works well for raising larger groups of kids that have been removed from the mother soon after birth. It is the recommended system when a number of kids are being taken away, as with a milking herd.
