*Min-Max BUCKEYE[™] Nutrition products are formulated to be fed by weight. 1 qt of Senior Balancer weighs approximately 1.20 lb

Senior Balancer is designed to be fed with good quality forage, pasture or hay. If dental issues prevent older horses/ponies from chewing and digesting long-stemmed hay properly, provide a forage alternative such as SAFE 'N EASY Complete by BUCKEYE Nutrition at a minimum of 1.5% of body weight per day to support healthy digestion. Senior Balancer may also be soaked for ease of consumption for horses/ponies with dental concerns.

Provide clean, fresh water at all times.

If additional calories are needed, do one of the following:

- Add ULTIMATE FINISH[™] 25, 40 or 100
- Incorporate additional BUCKEYE Nutrition feeds
